LANGUAGES

Vietnamese — Native

Japanese — JLPT N2

English — B1 (TOEIC 650)

CORE SKILLS

PLC Programming (KEYENCE / Mitsubishi / Omron)

HMI / Touch Panel Design

Robot Teaching (Yaskawa SCARA, IAI)

Safety PLC Systems

AI Image Processing

C# / Python / C++

Control Panel Design & Wiring

FA / Smart Factory Systems

CAREER SUMMARY

Control Design Engineer with 3+ years of R&D experience in Factory Automation (FA). Specialized in AI image processing, robot control, and PLC system architecture. Combines a strong electrical engineering background with Yaskawa robot teaching and multi-vendor PLC skills (KEYENCE, Mitsubishi, Omron) to deliver accurate on-site problem solving and high-value, cost-effective smart factory solutions. Seeking roles as Solution Engineer, Technical Consultant, or Bridge Engineer to contribute to global smart factory initiatives.

WORK EXPERIENCE

Control Design Engineer

Toyo Seikan Group Holdings — Tokan Kogyo Co., Ltd.
Technology Development Center

Mar 2026 – Present

- Control design for production equipment at the Technology Development Center
- Development and improvement of FA systems supporting group manufacturing sites

FA Equipment Development / Control Design

Toho Technos Co., Ltd. (Japan)

Sep 2023 – Feb 2026

- Electrical design of production equipment (~8 equipment projects, ~22 months)
- PLC / HMI programming: KEYENCE, Mitsubishi, Omron (ladder & structured text)
- Robot integration: Yaskawa SCARA, IAI robots; Safety PLC design
- Control panel assembly, wiring, I/O checkout, touch panel setup, IO-Link

IO-Link / I/O Checkout

Electrical Equipment Installation

LICENSES & CERTS

2023.10 — KEYENCE Equipment Programming

2024.05 — Japanese Driver's License (Ordinary MT)

2026.03 — Yaskawa Robot Teaching

2026.04 — Low-Voltage Electrical Handling

INTERESTS

Drawing

Soccer

Volleyball

Camping

Reading

Handmade crafts

- Small-to-medium scale equipment installation support (~16 months, ~4 units)

Contract Engineer — Installation Supervision

Doan Nhat Electrical & Mechanical Co., Ltd. (Vietnam)

Jun 2023 – Aug 2023

- Supervision and inspection of factory electrical equipment installation
- On-site coordination for industrial electrical/mechanical systems

Intern Engineer — Maintenance

Jan–Mar 2023 · Apr–Jun 2023

DreamTech Co. (Vietnam)

- Equipment maintenance and preventive care at an electronics manufacturing plant
- Hands-on experience with production-line equipment and factory operations

EDUCATION

Japanese Language Course (Online)

VCI Human Resource Development Academy

Jul 2023 – Sep 2023

Bachelor's Degree — Technical Education / Engineering

Vinh University of Technology Education (Vietnam)

Sep 2018 – Jul 2023

High School Diploma

Aug 2015 – Aug 2018

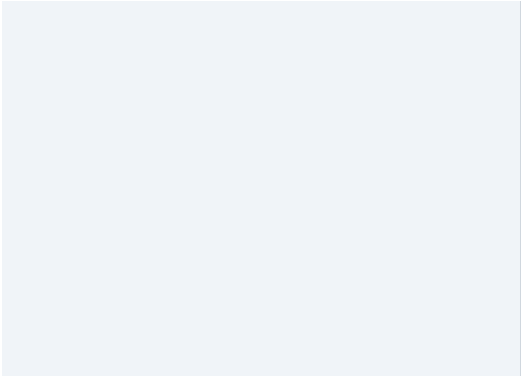

Quynh Luu 2 High School (Vietnam)

CAREER OBJECTIVE

In Japan's FA industry, I have engaged in R&D of AI image processing, industrial robots, and PLC systems for over three years. Going forward, I aim to leverage my development achievements and technical background (C# / Python / C++, control design) as a **Solution Engineer, Technical Consultant**, or **Bridge Engineer** — proposing and designing systems that solve real shop-floor challenges, and serving as a technical communication hub in global environments to advance smart factories and business growth.

SELF-PR

I continuously pursue balance between personal growth and physical/mental health. At work I bring passion for craftsmanship (drawing, reading), a deep respect for Japanese craftsmanship

culture, analytical thinking, creativity, and respect for diversity. Through regular sports (especially soccer), I maintain strong health, teamwork spirit, and quick decision-making under pressure. Weekly camping builds environmental adaptability and independent problem-solving skills.
