AUTOMATION / INDUSTRIAL

PLC Programming (KEYENCE /
Mitsubishi / Omron)

HMI / Touch Panel Design

Robot Teaching (Yaskawa SCARA, IAI)

Safety PLC Systems

AI Image Processing

Control Panel Design & Wiring

IO-Link / I/O Checkout

FA / Smart Factory Systems

CAREER SUMMARY

Control Design Engineer with 3+ years of hands-on R&D experience in Factory Automation (FA) within Japan's manufacturing industry. Skilled in PLC system architecture, AI image processing, and robot control across multiple vendors (KEYENCE, Mitsubishi, Omron, Yaskawa). Proficient in software development (C# / Python / C++) with practical experience in AI-assisted development workflows — building custom applications and prototypes from requirements through deployment. Combines deep automation expertise with software development capability to bridge hardware control and smart factory digital solutions. Seeking roles as Solution Engineer, Technical Consultant, or Bridge Engineer.

AI-ASSISTED DEVELOPMENT

Practical experience using AI coding assistants (Claude Code, Codex, Gemini) as development copilots throughout the software delivery lifecycle — from architecture design and code generation to debugging, testing, and deployment. AI accelerates prototyping and iteration while human technical judgment ensures code quality, maintainability, and production readiness.

LICENSES & CERTS

2023.10 — KEYENCE Equipment Programming

2024.05 — Japanese Driver’s License (Ordinary MT)

2026.03 — Yaskawa Robot Teaching

2026.04 — Low-Voltage Electrical Handling

AI DEVELOPMENT WORKFLOW

Requirements → AI-assisted Architecture → Code Generation → Review → Testing → Git/GitHub → Deployment

Use Claude Code, Codex, and Gemini as development copilots while maintaining full responsibility for architecture decisions, implementation quality, debugging, testing, and production deployment.

WORK EXPERIENCE

Control Design Engineer
Toyo Seikan Group Holdings — Tokan Kogyo Co., Ltd.
Technology Development Center

Mar 2026 – Present

- Control design for production equipment at the Technology Development Center
- Development and improvement of FA systems supporting group manufacturing sites

FA Equipment Development / Control Design
Toho Technos Co., Ltd. (Japan)

Sep 2023 – Feb 2026

- Electrical design of production equipment (~8 equipment projects, ~22 months)
- PLC / HMI programming: KEYENCE, Mitsubishi, Omron (ladder & structured text)
- Robot integration: Yaskawa SCARA, IAI robots; Safety PLC design
- Control panel assembly, wiring, I/O checkout, touch panel setup, IO-Link
- Small-to-medium scale equipment installation support (~16 months, ~4 units)

Contract Engineer — Installation Supervision
Doan Nhat Electrical & Mechanical Co., Ltd. (Vietnam)

Jun 2023 – Aug 2023

- Supervision and inspection of factory electrical equipment installation
- On-site coordination for industrial electrical/mechanical systems

Intern Engineer — Maintenance Jan–Mar 2023 · Apr–Jun 2023
DreamTech Co. (Vietnam)

- Equipment maintenance and preventive care at an electronics manufacturing plant
- Hands-on experience with production-line equipment and factory operations

INTERESTS

Drawing Soccer Volleyball
Camping Reading
Handmade crafts

EDUCATION

- Japanese Language Course (Online)
VCI Human Resource Development Academy
Jul 2023 – Sep 2023
- Bachelor's Degree — Technical Education / Engineering
Vinh University of Technology Education (Vietnam)
Sep 2018 – Jul 2023
- High School Diploma
Quynh Luu 2 High School (Vietnam)
Aug 2015 – Aug 2018

CAREER OBJECTIVE

In Japan's FA industry, I have engaged in R&D of AI image processing, industrial robots, and PLC systems for over three years. Going forward, I aim to leverage my development achievements and technical background (C# / Python / C++, control design, AI-assisted software development) as a **Solution Engineer, Technical Consultant**, or **Bridge Engineer** — proposing and designing systems that solve real shop-floor challenges, and serving as a technical communication hub in global environments to advance smart factories and business growth.

SELF-PR

I continuously pursue balance between personal growth and physical/mental health. At work I bring passion for craftsmanship (drawing, reading), a deep respect for Japanese craftsmanship culture, analytical thinking, creativity, and respect for diversity. Through regular sports (especially soccer), I maintain strong health, teamwork spirit, and quick decision-making under pressure. Weekly camping builds environmental adaptability and independent problem-solving skills.
